## GICC LLC Receives Award

**Arthur V. Martin**, President and Principal Research Scientist recently was awarded special recognition by the United States Department of Commerce for Export Excellence.

Pictured above, Art is receiving the award, one of only two awarded, by a representative of the U.S. Department of Commerce.

Art and his business partner, Kevin M. Martin were instrumental in developing a totally organic, non GMO, drug and alcohol free anti-pathogenic solution currently used across a wide spectrum of applications. It is effective against 170+ fungi, bacteria, viruses and yeasts.

GICC LLC is currently exporting to more than 20 countries enhancing health and wellness in people, animals and crops through environmentally safe products.

## GICC LLC Enhances Maize Harvest

Working closely with Shonga F.H. Nigeria LTD, GICC LLC utilized its proprietary organic, anti-pathogenic solution to combat “army worm” and “stem borer” insects posing a serious challenge to Maize production.

Prior use chemical based products required multiple applications, yielded less than acceptable results and left environmental damage.

*Path-Away Plant Protectant*® developed by GICC LLC provided rejuvenation of already infested leaves after a single week. Overall plant performance improved substantially.

With everyone in the food related industry trying to go “organic” the Path-Away® product line, which is organic, is believed to have an edge in control of insect pests, thereby increasing yield and farmer profitability.

*Path-Away Plant Protectant*® With Growth Enhancer has been recommended to Nigerian farmers due to its effectiveness, environmental safety, ease of use and its overall performance.
